# Problem statement

In the digital era having an online Portofolio is essential for showcasing personal and professional details

Traditional resume are statics while a Portofolio website provides an Interactive way to highlight bio data, education, skills, and Project

The problem is that many students and job seeker to not have a simple, structure and visually appealing digital portfolio to present themselves.

# Project Overview

---

The project aims to design and develop a person Portofolio web page using HTML and CSS.

The web page will contain the individual 's bio data, skills, Hobbies, education, and personal information in a structure table format

A profile picture and simple Layout enhance the professional look

## End Users

**Student-to showcase their academic details and Skill**

**Job seeker-to present resumes digitally to employee**

**Freelancers-to demonstrate Skill and personal branding**

**Professional-to maintain an online presence**

## Tools and Technologies

**HTML-for creating the structureoftheportfolio**

**CSS 3-for styling and Layout design**

**Webbrowser-for testing (choose, edge, firebox)**

# Portfolio Design and Layout

---

**Header section-title and portfolio Picture**

**Table sections-bio data including name,dob,email,phone, address, education, skills and hobbies**

**Responsive- adjustable for desktop and mobile screen**

## Features and Functionality

DISPLAY PERSONAL BIO  
DATA IN A CLEAR TABLE  
FORMAT

PROFILE PICTURE AT  
THE TOP

RESPONSIVE AND  
USER-FRIENDLY  
DESIGN

SIMPLE STRUCTURE  
FOR EASY  
CUSTOMIZATION

# Result and screenshots

---

**HOME PAGE WITH PROFILE  
PICTURE AND TITLE**

**BIO DATA TABLE WITH DETAILS  
(NAME, EDUCATION, SKILLS, ETC)**

## Conclusion:

This project demonstrate how to create a simple yet effective portofolio web page using basic web technologies (HTML &CSS)

It serves as a digital Identify for students and professional, making it easier to share information with Recruiters, institutions or client
